Question 16 -18

The topic of thought is one area of psychology, and many observers have considered this aspect in connection with robots and computers: Some of the old worries about AI (artificial intelligence) 16 the question of

whether computers could think. The first massive electronic computers, capable of rapid (if often unreliable) computation and little or no creative activity, were soon dubbed 'electronic brains.' A reaction to this terminology quickly followed. 17, computers were called 'high-speed idiots,' and effort to protect human vanity. In such a climate, the possibility of computers actually 18 was rarely considered: It was bad enough that computers might be capable of thought.

Question 19-20

The average American produces about 20 tons of the major greenhouse gas carbon dioxide (CO₂) every year. That might sound like a lot — and Americans do have among the biggest carbon footprints in the world — but the entire world emits around 27 billion tons of CO₂ each year, 19 transportation, electricity use, deforestation. Look at those numbers for a moment, and you'll realize there's very little that any of us can do on an individual level to stop climate change. Live like a monk, take away your 20 tons — stop breathing if you'd like — and you'll 20 scratch the surface.

The cries of cultural imperialism are a 22 phenomenon. 23 western colonial empires in Asia, Africa and South America, nationalists in the newly independent countries often became outraged over the staying power of colonial cultures. These nationalists named the presence and domination of Western culture as 'cultural imperialism.' Paul Harrison in his book, 24, described it this way, "And so there grew up, alongside political and economic imperialism, that more insidious form of control --- cultural imperialism. It conquered not just the bodies, 25 the souls of its victims."

Part III. Reading Comprehension. In this part, you will read several passages. Each one is followed by one question or a number of questions about it (them). Question 26-40, you should choose the **ONE** best answer to each question. 2 points each.

Why don't people consult an herbalist and take his advice instead? One reason is that only a few herbalists have made a thorough analysis of herbal medicine. Most of the time, some herbalists don't know what makes up the herbal medicine they are prescribing. It is not uncommon that some people, especially young children, may suffer great pain because the herbal medicine qualifications of some herbalists are sometimes called into question. Some

of them have never received enough formal medical education. At best, they have just passed a test, which is given to make sure that they know the names of certain herbal drugs and their composition; at worst, they are no more than quacks. Finally, few large-scale experiments with herbal drugs are conducted.

Yet some people still ask herbalists for advice. They do so when doctors declare that no chemical medicine can treat a certain disease. Under the circumstances, people may gamble with their own lives, acting human guinea pigs for herbalists.

26. According to this passage, people may take herbs like ginger for several reasons. Which of the following is NOT one of them?

- (A) The herbs are cheap and easy to come by. (B) Their illness may not be serious enough
(C) The herbs may taste good (D) The herbs may really help them recover

27. In this passage, three reasons are given to explain why people won't go to see an herbalist. Which of the following is NOT one of them?

- (A) Qualification tests are not credible. (B) Herbalists are poorly educated
(C) Experiments are not widely conducted. (D) The components of herbal medicine are poisonous.

28. By saying "people may gamble with their own lives," the author suggests that it is _____ to ask an herbalist for advice.

- (A) sensitive (B) inevitable (C) risky (D) expensive

29. According to this passage, people may go to see an herbalist when their illness is _____.

- (A) unknown (B) incurable (C) infectious (D) serious

In the past, writing was considered exclusive and time-consuming. The advent of the printing press popularized the written word and ushered in the gradual rise in global literacy. The speed and legibility of writing was greatly improved by the typewriter. But all of these were eclipsed when the personal computer came of age as the standard tool for writing. But what new dimensions and drawbacks, if any, does it offer?

30. The expression 'ushered in' is closest in meaning to _____.

- (A) hindered (B) instigated (C) procured (D) harmonized

31. Which of the following could best replace the word 'eclipsed'?

- (A) taken over (B) redeemed (C) outshined (D) reproached

The rules of etiquette in American restaurants depend upon a number of factors: the physical location of the restaurant, e.g., rural or urban; the type of restaurant, e.g., informal or formal; and certain standards that are more universal. In other words, some standards of etiquette vary significantly while other standards apply almost everywhere. Learning the proper etiquette in a particular type of restaurant in a particular area may sometimes require instruction, but more commonly it simply requires sensitivity and experience. For example, while it is acceptable to read a magazine in a coffee shop, it is inappropriate to do the same in a more luxurious setting. And, if you are eating in a very rustic setting, it may be fine to tuck your napkin into your shirt, but if you are eating in a very rustic setting it may be fine to demonstrate a lack of manners. It is safe to say, however, that in virtually every restaurant it is unacceptable to indiscriminately throw your food on the floor. The conclusion we can most likely draw from the above is that while the types and locations of restaurants determine etiquette appropriate to them, some rules apply to all restaurants.

32. With what topic is this passage primarily concerned?
(A) rules of etiquette (B) instructions in proper etiquette
(C) the importance of good manners (D) variable and universal standards of etiquette
33. According to the passage, which of the following is a universal rule of etiquette?
(A) tucking a napkin in your shirt (B) not throwing food on the floor
(C) reading a magazine at a coffee shop (D) eating in rustic settings

Now scientists are beginning to find that the most sexual part of the human body is the brain and it is inherently different in men and women. Scientific literature contains abundant evidence that males and females, even when little boys and girls, fall into distinct behavioral stereotypes. But with the advent of ever more powerful brain scanners, it seems these distinctions are the result of physical differences in the chemistry and neural circuitry of the brain that are laid down at birth.

34. This passage might be from an article on
(A) Human Revolution (B) Men and Women: Minds Apart
(C) Difference in Sexuality between Men and Women (D) The Newly developed brain scanner
35. "That men are better in target-directed motor skills, whereas women are stronger in precision manual tasks" would be a good example of _____.
(A) behavioral distinctions between males and females.
(B) the fact that brain is inherently different in men and women.
(C) cultural influences (D) men being more capable than women

British people have mixed opinions about the Americans, reflecting the close but sometimes troubled relationship between the two nations. When people get to know Americans as individuals they have a lot more respect and affections for them than the popular, rather negative stereotype based on a casual meeting or on television programs might suggest. For many British people the US is associated with power in international politics, Hollywood, money and violence. Although Americans believe they rule the world, few of them know much about anything outside the US. The British think that money matters more than anything else to Americans, and they also think the US is a dangerous place where cannot walk in the streets or subways without fear of being attacked. Despite this, many want to go there for their holidays. And Young people generally have a much more positive attitude and love everything that comes out of America.

On the other hand, the US once belonged to Britain, and many Americans have British ancestors, so when Americans think of Britain, they think of a place that seems very familiar. Americans watch British television programs, especially period dramas, see James Bond films, and read detective stories by Agatha Christie. On the basis of these experiences, which are common even to people who are not of British origin, most Americans know more about Britain than about any other county. However, many Americans would have difficulty drawing map of Britain. They think the country consists of London and a village in Scotland where one of their ancestors came from. Every British has a servant and has great respect to the Queen. Americans admire the behavior of the British believing that they are quaint, although they themselves would never want all their social rules. British people, to them, are perfectly polite and proper, always knowing which knife and fork to use, saying "please" and "Excuse me." However, they are often conceived as being snobbish and do not seem friendly. The famous British reserve seems cold to Americans who are more used to an open enthusiastic way of communicating. Thus a result, when British say: "That's no problem" when they know that it will be a big problem, it confuses the Americans.

36. What might be a proper title for this reading?
(A) What British people think of Americans. (B) What Americans think of British people.
(C) Great Britain, the ancestors of the Americans. (D) Cultural stereotypes.

37. What do British usually think of Americans?

- (A) They have mixed feelings. (B) They feel indifferent.
(C) They never want to have any association with American. (D) They admire everything that is American.

38. Which of the following is true about the US from British perspective?

- (A) Most Americans know a lot about the world outside the US.
(B) Few Americans know a lot about the world outside the US.
(C) Americans value power more than anything else.
(D) The US subway is the only public transportation available.

39. When Americans think of Britain, what do they usually feel?

- (A) They feel indifferent. (B) They feel annoyed.
(C) They feel familiar. (D) They never want to be associated with Britain.

40. According to the reading, which of the following is true?

- (A) American can easily draw a British map.
(B) Many Americans watch British television programs.
(C) Americans never wanted to be associated with Britain because they once belonged to Britain.
(D) Americans think only the British movie stars can have servants.
