Question 19 to 22

Freeze-drying is a technique that can help to provide food for astronauts. But it also has other applications nearer home. Freeze-drying is like suspended animation for food; you can store a 19 for years, and then, when you're finally ready to eat it, you can completely revitalise it with a little hot water. Even after several years, the original foodstuff will be virtually unchanged.

The technique basically involves completely removing the water from some material, such as food, while 20. The main reason for doing this is either to preserve the food 21 reduce its weight. Removing the water from food keeps it from spoiling, because the microorganisms such as bacteria that cause spoiling cannot survive without it. Similarly, the enzymes which occur naturally in food cannot cause ripening without water, so 22 from food will also stop the ripening process.

19. A. freeze-dried meal B. freeze-drying meal C. meal with freeze dry
 D. meal in freeze drying E. frozen dry meal
 20. A. it leaves the rest of material virtually being intact B. leaving the rest of the material virtually intact
 C. leave the rest of the material virtually intact D. leave the rest of the material virtually being intact

Question 23 to 25

Dolphins are often the star attractions at zoos, aquariums and aquatic theme parks. They jump on command through fiery hoops and 23 other dolphins. They seem delighted to perform their tricks and side up to their human handlers, content with the applause of their audience, a pat on the head and a gift of some raw fish now and then 24. Dolphins have a darker side. Dolphins have an unusual ability: to plot with others, communicate plans and execute them effectively. This indicates intelligence and communicative skills beyond 25. Dolphins, porpoises and whales are often thought of as fish since they live in the water. However, they are aquatic mammals. They cannot live indefinitely under water and must come to the surface periodically for air. They have "blowholes" at the top of their skulls to exhale air, even under water. Their young are born alive and are suckled by the parents.

D. Turner planned to trade his umbrella for a bus ride.
E. Turner planned to take a taxi.

Someday we will all have robots that will be our personal servants. They will look and behave much like real humans. We will be able to talk to these mechanical helpers and they will be able to respond in kind. Amazingly, the robots of the future will be able to learn from experience. They will be smart, strong, and untiring workers whose only goal will be to make our lives easier.

27. Which sentence from the paragraph expresses the main idea?

- A. Someday we will all have robots that will be our personal servants.
B. We will be able to talk to these mechanical helpers and they will be able to respond in kind.
C. They will be smart, strong and untiring workers.
D. Amazingly, the robots of the future will be able to learn from experience.
E. They will look and behave much like real humans.

The success of fluoride in combating dental decay is well established and, without a doubt, socially beneficial. However, fluoride's toxic properties have been known for a century. In humans excessive intake (for adults, over 4 milligrams per day) over many years can lead to skeletal fluorosis, a well-defined skeletal disorder, and in some plant species, fluoride is more toxic than ozone, sulfur dioxide, or pesticides.

3. Some important questions remain. For example, the precise lower limit at which the fluoride content of bone becomes toxic is still undetermined. And while fluoride intake from water and air can be evaluated relatively easily, it is much harder to estimate how much a given population ingests from foodstuffs because of the wide variations in individual eating habits and in fluoride concentrations in foodstuffs. These difficulties suggest that we should be wary of indiscriminately using fluoride, even in the form of fluoride-containing dental products.

28. The passage suggests which of the following about the effect of fluoride on humans?

- A. The effect is more easily measured than is the effect of exposure to pesticides.
B. The effect of fluoride intake from water and air is relatively difficult to monitor.
C. In general the effect is not likely to be as harmful as the effect of exposure to sulfur dioxide.
D. An intake of 4 milligrams over a long period of time usually leads to a skeletal disorder in humans.
E. An intake of slightly more than 4 milligrams for only a few months is not likely to be life-threatening.

29. The paragraph following these passages is mostly likely about

- A. how to use fluoride carefully.
B. diseases caused by ingesting too much fluoride.
C. interesting results of experiment by some dental scientists.
D. an analysis of fluoride in its use in other industries.
E. scientific evidence provided by orthopedic specialists.

Superconductivity is the ability of certain materials to conduct electrical current with no resistance and extremely low losses. This ability to carry large amounts of current can be applied to electric power devices such as motors and generators, and to electricity transmission in power lines. For example, superconductors can carry as much as 100

times the amount of electricity of ordinary copper or aluminum wires of the same size.

Scientists had been intrigued with the concept of superconductivity since its discovery in the early 1900s, but the extreme low temperatures the phenomenon required was a barrier to practical and low-cost applications. This all changed in 1986, when a new class of ceramic superconductors was discovered that "superconducted" at higher temperatures. The science of high-temperature superconductivity (HTS) was born, and along with it came the prospect for an elegant technology that promises to "supercharge" the way energy is generated, delivered, and used.

30. In which of the following publication types would this article most likely appear in?

- A. A scholarly journal read by specialists and scientists who work directly with superconductivity
- B. A modern science magazine intended for leisure reading.
- C. A book chapter in an advanced chemistry textbook
- D. A magazine intended to be dispersed at home craft fair
- E. A trade show magazine which focuses on super-cooled refrigeration units

31. What is the barrier to superconductivity at the early stage of its discovery?

- A. high resistance
- B. technology that supercharge the way energy is used
- C. low-cost application
- D. its capacity to carry electricity
- E. low temperature

Those who criticize the United States government today for not providing health care to all citizens equate health care provision with medical insurance coverage. By this standard, seventeenth- and eighteenth-century America lacked any significant conception of public health law. However, despite the general paucity of bureaucratic organization in pre-industrial America, the vast extent of health regulation and provision stands out as remarkable.

Of course the public role in the protection and regulation of eighteenth-century health was carried out in ways quite different from those today. Organizations responsible for health regulation were less stable than modern bureaucracies, tending to appear in crises and wither away in periods of calm. The focus was on epidemics which were seen as unnatural and warranting a response, not to the many endemic and chronic conditions which were accepted as part and parcel of daily life. Additionally, religious influence was significant, especially in the seventeenth century. Finally, in an era which lacked sharp demarcations between private and governmental bodies, many public responsibilities were carried out by what we would now consider private associations. Nevertheless, the extent of public health regulation long before the dawn of the welfare state is remarkable and suggests that the founding generation's assumptions about the relationship between government and health were more complex than is commonly assumed.

32. Among the following statements about the United States government's role in the provision of health care, which finds the LEAST support in the passage?

- A. The government today addresses health concerns that formerly were not considered serious enough to warrant government involvement.
- B. What were once public health-care functions are now served by the private sector.
- C. Philosophical considerations play a less significant role today in the formulation of public health-care policies than in previous centuries.
- D. Public health care today is guided largely by secular rather than religious values.
- E. Modern public health-care agencies are typically established not as temporary measures but rather as permanent establishments.

33. Which of the following best expresses the author's point of contention with "those who criticize the United States government for not providing health care to all citizens" (lines 1)?

- A. Their standard for measuring such provision is too narrow.
- B. They underestimate the role that insurance plays in the provision of health care today.
- C. They fail to recognize that government plays a more significant role today in health care than in previous eras.
- D. They misunderstand the intent of the founding generation with respect to the proper role of the government in the

area of health care.

E. They lack any significant conception of public health law.

34. Which of the following best expresses the main point of the passage?

A. The government's role in health care has not expanded over time to the extent that many critics have asserted.

B. The government should limit its involvement in health care to epidemiological problems.

C. Health problems plaguing pre-industrial America resulted largely from inadequate public health care.

D. History suggests that the United States government has properly played a significant role in provision of health care.

E. Private insurance is an inadequate solution to the problem of health care.

Graffiti is a general term for wall writing, perhaps humankind's earliest art form. The crude wall writings of prehistoric times and the highly stylized street art of today's inner-city youths share one common feature: Each stems from a basic human need to communicate with others. For youths who may not be able to express themselves through other media, such as prose or music, graffiti represents an easily accessible and effective way to communicate with a large audience. Anyone can obtain a can of spray paint and "make their mark" on a highway overpass or the side of a building.

Modern graffiti generally falls into one of three categories—junk graffiti, gang graffiti, and tagging. Junk graffiti messages are not gang-related but often involve obscene, racist, or threatening themes. The line separating gang graffiti and tagging to more threatening gang activities, is now considered an entry level offense that can lead to more serious crimes, including burglary and assault.

35. According to these two passages, what is the common feature of Graffiti?

A. To threaten others B. To make their mark C. To communicate with others as a human need

D. To vandalize the landscape E. To challenge the public

36. Paragraphs following these passages are most like about

A. detailed description of three categories of graffiti.

B. how to punish those who make graffiti.

C. why youths need to express themselves through such an urban crime.

D. other ways to communicate with people through other art forms.

E. the development of earlier graffiti.

Most cultures set an age at which its young people become adults in the eyes of the law. This age is called the age of majority. When people reach this age, usually 18, they become entitled to certain inalienable rights from which they were precluded as minors, such as the right to vote. Before becoming adults, minors are not able to enter into legal contracts. This is seen as being for their own protection. They are also protected from statutory rape, from being exploited in the labor market, and from having to go through the same penal system as adults.

37. Which of the following would be an example of a protection specifically to minors?

A. The right to vote B. The right to a fair trial C. Child labor laws

D. Separate penal system E. Legal contracts

38. Which of the following would be an example of a right denied to minors?

A. The right to vote B. The right to a fair trial C. Child labor laws

D. Separate penal system E. Going to court

39. The word "statutory" in the passage is closest in meaning to

A. part of a statue B. punishable under the law C. said or stated D. serious E. casual

40. In which of the following publication types would this article most likely appear in?
- A. A scholarly journal read by sociologists. B. A modern magazine intended for leisure reading.
C. A book chapter in a textbook about law and life D. A newsletter intended to be dispersed at court
E. A scholarly journal read by lawyers.

Part IV. Essay. 20 points.

The world's climate scientists recently reported unequivocally that the Earth's climate system is increasingly heating up and that it likely has not been this warm for at least 1300 years. We all must begin reducing global warming, and fortunately there is much to do. **Please write an essay in about 150 words about how you can help to reduce global warming.**

解釋名詞：每題 5%

- 1 顯著水準
- 2 z 分數
- 3 操作性定義 operationalisation
- 4 系統抽樣

請詳細回答下列各題。

- 5 何謂第一類型錯誤？當接受虛無假設時，發生第一類型錯誤的機率是多少 ($\alpha=.05$)？(10%)
- 6 Pearson 相關係數的範圍為何？其數值的正負各代表什麼意義？(10%)
- 7 何謂調查研究的外在效度？如何可以提高外在效度？(10%)
- 8 何謂問卷的信度及效度？兩者間有何關係？(15%)
- 9 「前實驗設計」、「準實驗設計」、「真實驗設計」三者如何區分？(15%)
- 10 測量的尺度有那四類？各有何特質。(20%)

請回答下面四題，每題 25%。

- 一、醫療社會學興起與 1970 年代，學者以社會建構的立場建立了「社會醫學模式」，並批評了「生物醫學模式」。請問他們的立足論點為何？對「生物醫學模式」的批評又是什麼？你認為這樣的二分思考，有什麼問題？（本題答案分成三部分，各佔 10%，這題佔總分 30 分）
- 二、醫療是一個重要的社會現象，請你就下面的二個議題選其中的一個議題，提出你如何思考其社會面向的複雜性：「醫病關係」或「醫療專業者的職場經驗」，請考慮性別、階級、族群、世代的差異。（這題佔總分 30 分）
- 三、請你以「醫療疏失」為例，做一個社會學的分析。你可以舉自己最熟悉的例子。（這題佔總分 20 分）
