In May 1960, the FDA approved the sale of a pill that arguably would have a greater impact on American culture than any other drug in the nation's history. For women across the country, the contraceptive pill was liberating: it allowed them to pursue careers, fueled the feminist and pro-choice movements and encouraged more open attitudes towards sex.

Among the key players in the development of the drug were two elderly female activists who demanded a contraceptive women could eat like aspirin and then paid for the scientific research; a devout Catholic gynecologist who believed a robust sex life made for a good marriage and argued tirelessly that the Pill was a natural form of birth control; and a brilliant biologist who bullied a pharmaceutical company into risking a possibly crippling boycott to develop this revolutionary contraceptive. In describing the obstacles they all hurdled, The Pill presents a compelling account of a society in transition.

- 29. The passage would most likely to be found in a textbook on which of the following subjects:
 - (A) Social Studies
- (B) History
- (C) Biology
- (D) Writing
- (E) Psychology

30. It can be inferred from the passage that _

- (A) the sale of the contraceptive pill was a success
- (B) the sale contraceptive pill had strengthened the feminist movement
- (C) the contraceptive pill was the trigger of AIDS
- (D) no other drug could be as successful as The Pill
- (E) the sale of the Pill has started the fight between biologist and gynecologist

Someday we will all have robots that will be our personal servants. They will look and behave much like real humans. We will be able to talk to these mechanical helpers and they will be able to respond in kind. Amazingly, the robots of the future will be able to learn from experience. They will be smart, strong, and untiring workers whose only goal will be to make our lives easier.

As the conflict in Iraq deepens, so has the debate about television coverage. Secretary of Defense Donald H. Rumsfeld complained on Friday that "media mood swings" was distorting the depiction of American military strategy. Actually, the movement was less up and down than across the ideological spectrum. In the initial phase, the loudest complaints about bias were lodged by antiwar groups frustrated that television gave scant attention to their protests. As casualties mounted, so did conservatives' laments about a liberal bias at the networks.

Diagnosing Alzheimer's disease (AD) has always been an inexact science. Now, there may be a new tool to add to the box. Researchers from the Medical College of Wisconsin used magnetic resonance imaging (MCI) to scan the brains of 24 people. By measuring activity in the hippocampus, the first place AD develops, they could determine which patient were normal, which had AD, and which had mild cognitive impairment (MCI), a major risk factor for AD. Until now, doctors have relied on the patient's symptoms to distinguish between patients with MCI and people with AD; the new test could provide objective information about just how close an MCI patient is to eventually developing AD.

The test is years from perfection and AD drugs are still in trial stages. But the possibility of early detection is now closer.

- 33. What might be a good title for this passage?
 - (A) Alzheimer's Advance
- (B) Alzheimer's Cause
- (C) The Testing Process of Alzheimer

- (D) the test and AD drugs
- (E) the comparison between AD and MCI
- 34. The new test is served to be ____.
 - (A) a perfect treatment for AD patients now
 - (B) a pre-trial for a new drug
 - (C) a research tool for collecting data for the better treatment for AD patients
 - (D) detecting the relationship between the AD patients and the current drugs used for AD
 - (E) a possible early detection about how a MCI patient would develop AD

statement.

The Snowy Owl is a bird of Arctic tundra or open grasslands and fields. They rarely venture into forested areas. During southward movements they appear along lakeshores, marine coastlines, marshes, and even roost on buildings in cities and towns. In the Arctic, they normally roost on pingaluks (rises in the tundra) and breed from low valley floors up to mountain slopes and plateaus over 1,000 meters (3,000 feet) in elevation. When wintering in the Arctic, they frequently wind-swept tundra with little snow or ice accumulation. At more southern latitudes they typically frequents agricultural areas

35. The passage is about the Snowy Owl's
(A) classification (B) hunting (C) breeding (D) habitat (E) distribution
Another noteworthy trend in twentieth-century in the United States has been the use of folk and popular music as a base for more serious composition. The motivation for these borrowings from traditional music might be a desire on the part of a composer to return to simpler forms, to enhance patriotic feelings, or to establish an immediate rapport with an audience. For whatever reason, composers such as Aaron Copland and Charles Ives offered compositions featuring novel musical forms flavored with refrains from traditional Americana. Copland drew upon folk music, particularly as sources for the music he wrote for the ballets Billy the Kid, Rodeo, and Appalachian Spring. Ives employed the whole gamut of patriotic songs, hymns, jazz, and popular.

(C) the works of Aaron Copland (D) the history of folk and popular music
37. Which of the following best describes the main idea of the passage?
(A) Traditional music flavored some American musical compositions in the twentieth century.
(B) Ives and Copland have used folk and popular music in their compositions.
(C) A variety of explanations exist as to why a composer might use traditional sources of music
(D) Traditional music is composed of various type of folk and popular music.
38. It can be inferred from this passage that the author is not sure
(A) when Ives wrote his compositions (B) that Ives and Copland actually borrowed from traditional music
(C) why certain composers borrowed from folk and popular music
(D) if Copland really featured new musical forms
39. Which of the following is NOT listed in the passage as a source for Ives's compositions?
(A) National music (B) Religious music (C) Jazz (D) American novels
40. The passage would most probably be assigned reading in which of the following course?(A) American History (B) The History of Jazz (C) Modern American Music (D) Composition

Little is known about how illness characteristics are related to sibling adjustment and family functioning. The purpose of this study of 90 healthy sibling of children with diabetes (n=45) and asthma (n=45) was to examine relationships between seriousness (嚴重度) and visibility (可見度) of illness, and self concept. The siblings in the diabetes group had higher ratings on seriousness than siblings in the asthma group (p< .02). For the diabetes group, visibility was inversely correlated (負相關) with behavioral conduct, while seriousness was inversely related to scholastic competence. For the asthma group, visibility was inversely correlated with social acceptance and athletic (運動的) competence while seriousness was inversely correlated to athletic competence.

Data were obtained from 227 RNs working on 27 adult units in 10 hospitals. Twenty-five nurses (11%) reported an exposure to blood borne disease in the previous three months. Only 4 of the 25 exposures were reported. Nurses indicated that the primary reasons that needlesticks and other exposures occurred were: chaotic conditions on the unit, stress or crisis on the unit, and not following standard precautions. However, unit workload was not related to occupational injury rates.
